Aluminium Manifolds Threaded Fittings Pipe Manifolds

We are one of the largest suppliers of Aluminium Manifolds threaded Aluminium manifolds Pipe manifolds and fittings, Inlet outlet connectors made from Aluminium Brass and Stainless Steel from India. A manifold is composed of assorted hydraulic valves connected to each other. It is the various combinations of states of these valves that allow complex control behaviour in a manifold. A hydraulic manifold can be made from Aluminium Stainless Steel 304 316 or CDA 360 Brass and is a component that regulates fluid flow between pumps and actuators and other components in a hydraulic system.

- High Quality Aluminium material used for making manifolds CNC machined parts
- Threads BSP BSPT and NPT checked with thread gauges
- Stainless Steel manifolds and Brass Manifolds can also be offered
- ISO 9001:2015 certified process of manufacturing
- Allied Aluminium fittings CNC machined components turned parts machined parts also available
